NOTE FOR: Deputy Director, CPAS
FROM: Associate Deputy Director for Intelligence
SUBJECT: Electrical Dissemination

25X1

Jim Taylor had a meeting yesterday with [] and me to discuss an automated system for disseminating both current intelligence and D0 reporting. The sense of this meeting was that we probably should pursue the idea of disseminating current intelligence. It was less obvious that D0 reporting should be involved, at least in the initial planning. I suggest the following. You should get together a group including [] ODP, OC, OS, and D0 to discuss some of the issues raised in [] memo--security problems, costs, implications for current intelligence, etc. My suggestion is that we do this in an iterative way with a first cut at the answers to these questions that we can pass to Jim Taylor. It seems to me that we want to proceed quickly but without putting an inordinate amount of time on problems if there is no consensus that we should pursue this capability.
